

# Water Distribution Services

Whatever your challenge may be – large or small – let OCWA's specialized distribution team come up with a solution.

Our team of fully equipped, certified Water Drinking System Operators are ready to customize a program to support your needs – whether it be lack of time and staff to stay on top of maintenance and inspection schedules, to ongoing poor water quality or emergency situations.

OCWA's Water Distribution Division includes a full line of related services for Ontario municipalities:

- Hydrant maintenance and repair, raising/lowering, painting, pressure and fire flow testing
- System directional flushing
- Sampling and testing
- Swabbing of watermains and wastewater forcemains
- Valve cycling
- Valve and leak repairs
- Watermain servicing, wet or dry tapping
- Reservoir inspection, cleaning and disinfection
- Valve and meter chamber inspections and minor repairs
- Leak detection and leak detection surveys – using the latest in computerized equipment and above-ground listening devices

**Trust.** It flows from experience & commitment.

## Multi-Year Package Rates

While all of OCWA's Distribution System Services are available on a stand-alone basis, we highly recommend a multi-year maintenance package including swabbing, flushing (twice a year), valve and hydrant maintenance/repair/replacement as required, plus a full locate and mapping program – all for one low monthly price.

Let an OCWA Water Distribution Service Team member maintain your distribution system and help deliver a little peace of mind. Call today.
